

PROJECTS

ENVIRONMENTAL AUDIT

AUSTRALIAN NATIONAL RAILWAYS

A pre-divestiture investigation of soil and groundwater contamination was undertaken on behalf of Australian National Railways.

Six rail stations located throughout the Eyre Peninsula in South Australia were investigated, including the Port Lincoln Railway Yards.

Investigations included soil and groundwater bores, and a trial pit exercise.

Objective reports were prepared for each site using an agreed proforma.

Recommendations, including outline costs were made for remedial works necessary to permit redevelopment of each site.
